

Eduardo Mejía - Software Developer

Dear HashiCorp Recruitment Team,

My name is Eduardo Mejía, I'm from El Salvador Central America, currently living in Florida, USA. I found at StackOverflow Jobs that you're recruiting a **Growth Engineer**. I think I'm the right candidate for this position because of my 5+ years of relevant experience as a Web Developer and I am looking forward to learning more about Growth Engineering Development.

My experience includes being a Head of FrontEnd developer at a company in El Salvador and also as a Software Engineer at a company located in Virginia, it was a remote-based position.

I think my positive, results-driven, team-player, get-things-done attitude will fit just great at your organization. As a FrontEnd, I have worked on [usabili.me](#), [uniwellnesscare](#) landing page and Applications UIs like [CanLove Dashboard](#) and [RapidScreen](#), for about 5+ years in previous opportunities and I want to share and use my experience with you at HashiCorp.

Some links where you can find some of my work at [my GitHub](#) and [my LinkedIn](#).

Thank you for the time you have taken in order to receive and read my cover letter, in my application I have attached my résumé but if anything else is needed don't hesitate to let me know so I can update it right away.

Sincerely,

Eduardo Antonio Mejía Reyes
